Certain Felony Sentencing Data Now Available Online

High-level felony sentencing information from across Idaho's state courts is now available to view on the [Idaho Court Data](#) website.

Newly posted reports include general sentencing averages and other data for a variety of felony crimes, including drug crimes, property crimes, felony DUIs and crimes against persons. The reports can be found under the "Court Data Reporting and Evaluations" section of the site.

These reports replace a similar tool that informed judges on the sentences that their peers impose for felony cases across the state. The new reports use data provided through the Judicial Branch's case management system and have been reviewed for greater data accuracy.

Launched in 2020, the Court Data website offers a range of case statistics and financial data. Learn more by visiting the site at courtdata.idaho.gov.
