

SUMMARY STATEMENT

State v. Svelmoe, Docket No. 43181

The Supreme Court vacated Troy Svelmoe's conviction for felony DUI in this Kootenai County case. The Court concluded that the district court erred by allowing the State to rely on the standard operating procedures issued by the Idaho State Police in 2013 to establish a foundation for the test results because the Court had previously declared those procedures void and that the State failed to otherwise establish the reliability of the test results.
