

SUMMARY STATEMENT

Ackerschott v. Mountain View Hospital, LLC, Docket No. 46205

The Idaho Supreme Court affirmed the jury's verdict against Mountain View Hospital, LLC, doing business as Redicare. The Supreme Court held that the district court's rulings on Redicare's arguments regarding comparative fault and the admission of expert witness testimony were correct and that Redicare failed to properly preserve its expert witness claims before the trial court. The Court declined to reach the merits of the Ackerschotts' constitutional challenge of the cap on noneconomic damages on cross-appeal, holding the motion to alter or amend the judgment below was untimely. The Court did not award attorney fees or costs to either party.
