iCourt Portal Down for Extended Maintenance This Week

The iCourt Portal is experiencing an extended outage that may continue for the next couple of days.

The Portal offers the ability to search court dockets and case information in Idaho's state court system. The Portal website (mycourts.idaho.gov) is currently not accessible through public web browsers due to maintenance to fix a potential security vulnerability identified Tuesday by the software vendor.

This maintenance was initially expected to be short, but has proved more complicated than was first conveyed to court management. The Idaho Supreme Court's Information Division continues to work with the vendor to resolve this issue and restore full Portal access.

Access to public court records is still available through dedicated kiosks located at each county courthouse. Those kiosks are unaffected by the ongoing maintenance need.

Importantly: This work is being done as a precaution. It is not a response to any known security incident involving the Idaho courts.

We apologize for the disruption this outage has caused. Thank you to all Idaho Portal users for your patience.
