Work Continues to Complete iCourt Portal Maintenance

The maintenance outage affecting the public tool for searching case information in Idaho's state courts is likely to extend through at least Monday.

The iCourt Portal has not been accessible through public web browsers since Tuesday afternoon due to maintenance to fix a potential security vulnerability identified by the software vendor.

As noted in a [Wednesday news release](#), this maintenance has proved more complicated than was first conveyed to court management. The Idaho Supreme Court's Information Division continues to work with the vendor to secure and install its advised solution.

Access to public case information in Idaho remains available through dedicated kiosks located at each county courthouse and at the Idaho Supreme Court building in Boise.

Once again, the Idaho courts thank Portal users for their patience amid this disruption.
